EDUCATION

University of New Haven, West Haven, CT — May 2026
Bachelors of Science, Computer Science — **GPA:** 3.67/4.00, *Dean's List*

EXPERIENCE

Webster Bank, Southington, CT (Hybrid) — May 2025 – Aug 2025
Cybersecurity & IT Risk Intern

- Managed and reviewed evidence for **15+ security issues**, ensuring **100% milestone completion** and maintaining audit readiness ensuring a **100%** more secure environment.
- Conducted **5+ 3rd-party Information Security Risk Assessments** using vendor **SOC 2** reports, **RiskRecon**, and other tools. Went through peer review processes, improving vendor security compliance scores by **50%**.
- Created **3 process-specific training documents** improving cybersecurity awareness, reducing onboarding time for new cybersecurity interns and increasing employee engagement with security best practices by **15%**.
- Collaborated daily with a core team of **5+** Information Security professionals, and attended weekly cross-departmental meetings with **10+** security teams led by the **CISO** and **CIO** to stay aligned on department-wide security processes.
- Completed a deep-dive shadowing session with the **SOC** team, observing triage of **5-10** flagged phishing/security alerts across the incident detection and response toolchain using **5+ security tools** such as **Splunk**, **CrowdStrike**, **ProofPoint**, **VirusTotal**, **ReliaQuest**.
- Supported **3+** senior analysts and managers on Excel-based projects, and assisted with knowledge transfer of **5+** trackers and governance materials to colleagues increasing team efficiency by **10%**.

University of New Haven, West Haven, CT — Nov 2024 – May 2025
Research Assistant - Next-Gen Autonomous Vehicle Security

- Built a real-time **TCP/IP** data pipeline between **MATLAB** and **Unity**, parsing sensor fusion tracking data (**JSON**) to dynamically spawn and sync 3D vehicle objects in a **simulated driving environment.**
- Proposed a theoretical threat model covering 3 categories of cybersecurity attacks such as **sensor spoofing**, **data corruption**, and **network interception** as a framework for evaluating autonomous vehicle system resilience.
- Laid the technical foundation for reinforcement learning integration using **Unity's ML-Agents Toolkit** to train autonomous vehicle responses in complex environments.
- Collaborated with a 3-person student research team under guidance from **2-3** senior faculty/reviewers, contributing to research on safety, reliability, and cybersecurity in next-generation intelligent transportation systems.

IQ4, New York, NY (Remote) — Jun 2024 – Aug 2024
Information Security Officer Intern

- Analyzed real-world cybersecurity challenges with expertise in **GRC**, **SOC**, and the **NIST Cybersecurity Framework**.
- Conducted **threat modeling and incident response simulations**, formulating countermeasures that reduced theoretical breach impact by **30%** in case study scenarios.
- Produced **detailed security reports and executive summaries**, strengthening organizational awareness and reinforcing adherence to cybersecurity best practices.

PROJECTS

Ethical Hacking Penetration Test, West Haven, CT — Apr 2025 – May 2025

- Exploited **9+** CVEs (including **CVE-2017-0143**, **CVE-2019-0708**, **CVE-2016-5195**) across 3 custom VMs (**Ubuntu**, **Debian**, **Windows**), achieving remote code execution and privilege escalation to root/SYSTEM.
- Performed reconnaissance with **Nmap** and **Wireshark**, identifying **10+ exposed services/ports**, which enabled successful exploitation using **Metasploit Framework**, **Python PoCs**, and kernel exploits compiled with **gcc**.
- Documented findings in a **35+** page report aligned to **MITRE ATT&CK** and **NIST SP 800-53**, with executive summaries and **8+** remediation strategies.

SKILLS

Programming: Python, Java, C, C++, C#, SQL, Bash, TypeScript, JavaScript
Security Tools: Metasploit, Nmap, Wireshark, Burp Suite, VMware, Cisco Packet Tracer, RiskRecon,
Frameworks & Standards: NIST Cybersecurity Framework, MITRE ATT&CK, NIST SP 800-53, GRC, SOC, CVSS
Tools & Practices & Certifications: Linux, Git/GitHub, Docker, AWS, Postman, Agile/Scrum, Incident Response, Threat Modeling, Risk Assessment, Vulnerability Scanning, Coupa, LogicManager, Spectra, ***Lean Six Sigma Yellow Belt Certificate***, ***Cybersecurity Excellence Certificate: The Threat Within and NIST Framework***

ACTIVITIES AND LEADERSHIP

Computer Programming Club (*President),* **Upsilon Pi Epsilon** (*President)*, **Quinnipiac University NorthEast Annual Cybersecurity Summit** (*Student Ambassador*), **Wesleyan University Hackathon** (*Front End Lead*)
